sorry no retroactive adjustments.

## Jet-Blast Coolant

### Coolant Ports for Solid Cutting Tools

Jet-Blast Coolant Ports allow Air or Coolant to flow around solid cutting tools down the flutes for improved chip evacuation. Available in all standard end mill adapters 10" projection and shorter. We do the work @ PIONEER in Chicago, allowing us to alter any stock item. We add 2 coolant ports standard, special configurations available upon request and application. Delivery is 1-3 days.

Examples of Jet-Blast for  
special applications:
